About Me

Self-taught web developer with a strong focus on design and front-end development. Passionate about building user-friendly interfaces using React and modern design principles. Experienced in working in MERN stack and now exploring cybersecurity. Seeking part-time or freelance opportunities where I can grow, learn and contribute creativity.

Calicut University 2019-2022

Projects

Ai-Powered Portfolio Website

Tech Stack : Nextjs, Huggingface Inference API, formsubmit,Fetch API / Axios,Tailwind CSS

A modern personal portfolio with a built-in AI assistant that responds to visitor queries like a virtual interview. Features include dark/light mode toggle, interactive animations, responsive design and downloadable resume. Showcases project work and professional details in a clean UI.

Text to speech app

Tech Stack: Nextjs,Vercel, Tailwindcss,SpeechSynthesis API

A full stack web app to manage a simple and modern web application that converts written text into spoken words using the browser's built-in Web Speech API. Built with Next.js, TypeScript, and Tailwind CSS, the app allows users to enter any text, adjust voice, pitch, and rate, and listen to it out loud. It also supports light/dark themes with a clean, responsive UI.

Cybersecurity Awareness Quiz App

Tech Stack: React, TailwindCss

An interactive quiz that educates users on basic cybersecurity practices.
